

Ball Mill Standards

Several standards apply to ball mills, covering aspects such as design, safety, performance, and materials. Some relevant standards include:

- **ASTM A532** – Standard Specification for Abrasion-Resistant Cast Irons (for mill liners)
- **ISO 9001** – Quality management systems (for manufacturing processes)
- **ISO 45001** – Occupational health and safety management (for mill operation)
- **ISO 561** – Conveyor belts and material handling in mining
- **ISO 10816-1** – Vibration monitoring for rotating machinery
- **ANSI/ASME B20.1** – Safety standards for conveyors and related equipment
- **BS 4844** – Specifications for materials used in ball mill liners
