

Sustainable Farm

- ❖ Adams: Define the Economic, Ecological, and Societal Goal of the Farm
- ❖ Adjara: Break down the Stages and Time Frames of the farm's development
- ❖ Charles: Demonstrators – students Projects
- ❖ Gertrude: Individual Project Contribution
- ❖ Boris: Infineon Semiconductors' Role
- ❖ Lucas: Virtual Big – Long-Term Vision
- ❖ Wilfried: Demonstrators Small – Short-Term Actions
- ❖ Hamado: Medium-Term Planning

Break down

Adams: Goal of the Farm

- Focus on defining the “economic, ecological, and societal goals” of the sustainable farm.
- Research and outline how the farm can balance profitability, environmental sustainability, and social impact.
- Collaborate with other students to ensure alignment with their tasks.

Adjara: Stages and Time Frames

- Break down the farm's development into stages (e.g., planning, implementation, scaling).
- Define “time frames” for each stage (short-term, medium-term, long-term).
- Create a timeline that integrates with the goals and demonstrators.

Charles: Demonstrators – Students Projects

- Identify and document existing projects from each student that can serve as demonstrators for the farm.

- Map how these projects align with the farm's goals and stages.
- Collaborate with Gertrude to ensure coherence.

Gertrude: Individual Project Contribution

- Analyze how each student's "individual project and demonstrator" supports the overall farm goals.
- Identify synergies between projects and suggest improvements for better alignment.
- Collaborate with Charles and Boris.

Boris: Infineon Semiconductors' Role

- Research how Infineon semiconductors can be integrated into the farm's operations.
- Identify specific applications (e.g., energy management, automation) and their benefits.
- Collaborate with Lucas and Wilfried to align with virtual demonstrators.

Lucas: Virtual Big – Long-Term Vision

- Develop a virtual big vision for the farm over 1 year, 2 years, and 5 years.
- Use simulations, models, or digital tools to visualize the farm's growth and impact.
- Ensure alignment with the goals and stages defined by Adams and Adjara.

Wilfried: Demonstrators Small – Short-Term Actions

- Plan small demonstrators that are achievable within 4-8 weeks.
- Focus on practical, hands-on projects that showcase the farm's potential.
- Collaborate with Charles and Gertrude to ensure these demonstrators align with existing projects.

Hamado: Medium-Term Planning

- Develop a medium-term plan for what can be achieved in 1 year, 2 years, and 5 years.
- Bridge the gap between small demonstrators and the long-term vision.
- Ensure alignment with the stages, goals, and Infineon's role.
